

GLOBAL MULTIROW COERCIVITY RELEASE V1.1 ACCEPTANCE

Internal post-seal packaging and reproducibility audit. No third-party status, digital signature, or new mathematical verification claim is asserted.

ARCHIVAL RECOMMENDATION
ACCEPT
A. CORRECTED POST-SEAL RELEASE ACCEPTED - SELF-CONTAINED AND REPRODUCIBLE

Packaging repair

Release v1.1 adds the exact previous-audit packet required by the unchanged verifier and corrects REPRODUCE.txt to pass --previous-audit. The mathematical certificate PDF, source packets, proof packets, verifier, dependency lock, objective interval, ranks, nullities, and scope remain byte-for-byte unchanged where designated immutable.

Item	Result
Original v1.0 release SHA-256	01b4254cbd82254d6ac0e7e9d554d68d4bc20106c2e5e37ffcfe677bacff4093
Corrected v1.1 release SHA-256	38a870b440bf28ae73f42eb09d5ac01a5f5a8f5d35665842b952d50109b6f0a9
Previous-audit packet SHA-256	f076efdcc0c53a72ff4fedd2049cb40fb893faa504537d6e17f8577208384a26
Corrected member count	17
Immutable member preservation	PASS - 12/12 byte-identical
Embedded verifier exit code	0
Embedded verifier decision	Decision A reproduced
Semantic consistency	PASS
PDF validation	PASS; 10 pages; 21 valid bookmarks; fonts embedded
Self-containment	PASS

Audit environment

Linux-4.4.0-x86_64-with-glibc2.41; CPython 3.13.5; SymPy 1.14.0; mpmath 1.3.0; UTC audit timestamp 2026-07-19T13:07:09Z.

Audit limitations

This attestation verifies package integrity, self-containment, embedded-verifier replay, cross-artifact semantic consistency, and PDF integrity. It is an internal process artifact, not an external opinion, not a digital signature, and not an extension of the certified theorem.
